# Quality Means Doing the Job Right the First Time!

## Our Company

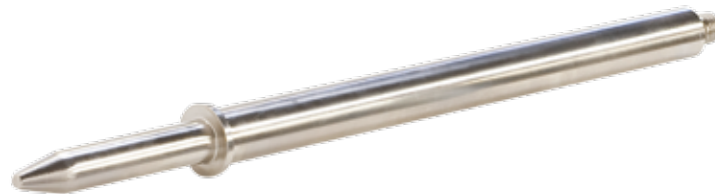

Advance Screw has been in business since 1948. The current family has owned and operated the business since 1964. Our mission statement "Quality Means Doing the Job Right the First Time" is what guides our employees to strive for 100% Quality with each part they manufacture.

We feel our attention to Quality, Customer Service and 100% On-Time Delivery is a direct result of why we have grown with our customers. We build all of our own tooling on-site so we can offer the shortest lead-times possible.

During the quoting process we work closely with our customers and offer cost saving ideas, so parts can be manufactured at the lowest possible cost.

To experience true customer satisfaction at a competitive cost, send inquires to [al@advancescrewprod.com](mailto:al@advancescrewprod.com) for your prototype, low and high volume needs.

## Our Company Commitment to Quality

At Advance Screw Products we continually strive to exceed customer's expectations. To insure customer satisfaction, we implemented an ISO compliant Quality System that includes, PPAP, FMEA, Process Control, SPC and Advanced Quality Planning.

Our highly skilled employees are dedicated and take great pride in the parts they manufacture. Their commitment to excellence separates us from our competition.

Tools made on-site to expedite customer orders.
